CAREER OBJECTIVE

Third-year Computer Science student at the College of Computing, Khon Kaen University, with a strong passion for backend development and building scalable solutions. Proficient in Java Spring Boot, Node.js, and PostgreSQL, with a solid understanding of modern software engineering principles. Seeking a Backend Developer internship to apply technical skills to real-world projects, learn industry best practices from experts, and gain hands-on experience for professional growth.

EDUCATION

2566 - Present

Khon Kaen University

College of Computing, Khon Kaen University

Bachelor of Science in Computer Science | 3rd Year Student

Focus: Backend Development, Database Design, and System Architecture

EXPERIENCE

2567

POS Pharmacy System

Backend Developer

Developed a pharmacy management system using Laravel 8 and MySQL. Features include inventory/purchase management with Excel Import/Export, a sales dashboard with Chart.js visualization, and real-time notifications.

2567

Food Order App (UserEatAtHome)

Mobile Developer

Engineered a cross-platform food ordering application utilizing Flutter for UI and Kotlin for native performance. Leveraged Firebase services to build a scalable backend, supporting Real-time Data Syncing for live order status updates and instant notifications across both Admin and User dashboards.

2568

E-commerce Backend API

Backend Developer

Engineered a scalable RESTful API with Spring Boot 3 and Java 21. Implemented RBAC (Role-Based Access Control) for multiple user roles, secure JWT Authentication, and multi-channel payment integration. Features include WebSocket-based real-time chat and an analytical Admin Dashboard.

2568

Game Key Marketplace

Full-Stack Developer

Developed a comprehensive marketplace for game keys (Steam, PS, Xbox, Nintendo, Epic) using React 19, Node.js, Express, and PostgreSQL. Integrated 15+ technologies to implement JWT auth, Digital Wallets, Gacha mechanics, Real-time Search, and a robust Admin Control Panel.

SKILLS

- Java & Spring Boot
- Node.js & Express
- PostgreSQL
- RESTful API
- React & Next.js
- JWT Authentication
- Laravel & PHP
- Flutter & Kotlin

LANGUAGE

- Thai (Native)
- English (Basic)
